

Next Steps

Next Steps

Your feedback and comments will be incorporated in the Stage 3 Report, which will be submitted to the DoECLG. There are challenges going forward:

- There is no guarantee of funding, finding sources of funding may be a challenge, funding for complex projects may require interdepartmental funding.
- Uncertainty in relation to public finance
- Time frames for regeneration are long term - maintaining the support of the community whilst also managing expectations.

These will be some of the challenges ahead.

In Stage 4 the Plan will be refined to produce a long term vision for the area. This will be put on public display. We will be working on an implementation strategy to make the Regeneration Masterplan happen.

Thank you for visiting the Exhibition
