

# INVITATION TO UPCOMING OPEN LECTURE...

## SPIRIT OF IRELAND

National Project for Energy Independence

By Graham O'Donnell of the Spirit of Ireland Project Team

<b>Venue</b>	Sligo Park Hotel
<b>Date</b>	Monday, 19th October 2009
<b>Time</b>	8:00pm

Ireland has some of the very best **natural energy resources** in Europe. The Spirit of Ireland Project aims to make this wind power available, useable and reliable on a large scale by storing our abundant wind energy in large hydro storage reservoirs.

Like Ardnacrusha and rural electrification, this project has the potential to **transform Ireland** within five years, ending our dependence on imported oil, gas and coal for power generation, make us energy competitive, stimulate the economy, create tens of thousand of jobs, and attract capital investment.

Graham O'Donnell, an Electrical and Electronics Engineer with over 20 years experience of international power networks, will give what promises to be a highly interesting and stimulating presentation on this Nationally important project. All are welcome!
